FULL STACK WEB DEVELOPER

Full Stack Web Developer with hands-on experience in MERN Stack, Python frameworks, and DevOps tools. Skilled in building scalable, secure, and user-centric applications. Passionate about cloud-native development and continuous learning.

EXPERIENCE

Technical Researcher | Royal Research

Mar 2024 - Present

- Conducting in-depth technical research and analysis in areas such as Back-End Web Development, MERN Stack, Django REST Framework, Flask, ASP.NET Core, ASP.NET Web API, and CSS.
- Utilizing expertise in Kali Linux and FastAPI to develop and implement innovative solutions, enhancing efficiency and functionality in web development projects.
- Collaborating with cross-functional teams to integrate cutting edge technologies, frameworks and DevOps technologies - contributing to the development, deployment, monitoring of robust, scalable web applications.

Dev Ops Engineer | Indium Software (India) Private Limited

August 2023 - Jan 2024

- Efficiently automate deployment pipelines and infrastructure configurations to ensure smooth and reliable software delivery.
- Implement robust monitoring and logging systems to proactively identify and resolve issues, ensuring high system availability and performance.
- Collaborate closely with development and operations teams to streamline workflows, foster continuous integration/continuous deployment (CI/CD) practices, and promote a culture of collaboration and innovation.

INTERNSHIPS

Full Stack Developer Intern | MockPI

Mar 2023 - June 2023

- Implemented frontend and backend development for the MockPI website using OpenAI technology.
- Integrated databases to ensure efficient data management and retrieval.
- Enhanced the website's UI/UX to create a dynamic and user-friendly experience.
- Successfully completed various tasks, applying skills in web development, API integration, and problem-solving.
- Contributed to the project's overall success by meeting deliverables and achieving project milestones.

Web developer Intern | Suvidha Foudation

Dec 2022 - Jan 2023

- Enhanced and optimized the company's website by implementing innovative designs and improving user experience.
- Ensured cross-platform functionality and responsiveness for seamless user interactions.
- Collaborated with the team to identify and address website issues, ensuring smooth navigation and performance.
- Gained valuable insights into website development processes and sharpened coding abilities through hands-on experience.

- Developed and maintained front-end and back-end systems for a food website.
- Collaborated with a skilled team to implement new features and optimize performance.
- Ensured seamless user experiences through UI/UX enhancements.
- Gained valuable hands-on experience in web development technologies, such as HTML, CSS, JavaScript, and frameworks.

PERSONAL PROJECTS

- Pencraft(author-Portal)Mar 2022 - April 2022
- Developed an E-commerce site using React, Commerce.js, and Material UI.
 - Implemented backend integration with MySQL and Node.js for data management.
 - Ensured seamless frontend interaction and user experience.

- Recipe Generation From Food ImageAug 2022 - Oct 2023
- Developed a Python-based system for recipe generation from food images using OpenCV.
 - Implemented image processing algorithms to extract relevant information.
 - Generated corresponding recipes based on the recognized food items.

- Nowdays (Chat Application)Apr 2022 - Jun 2022
- Developed a real-time chat application using ExpressJS, ReactJS, Socket.io, MongoDB, and NodeJS.
 - Implemented web sockets for real-time messaging.
 - Ensured seamless communication and data storage using MongoDB.

- Hospital Management SystemFeb 2023 - Mar 2023
- Developed a web-based Hospital Management System using PHP and JavaScript.
 - Implemented patient record management, appointment scheduling, and inventory tracking functionalities.
 - Facilitated seamless communication among medical staff for improved patient care and decision-making.
 - Streamlined medical processes to ensure efficient healthcare delivery and hospital operations.

ACADEMICS

- B.Tech (Computer Science & Engineering)Jun 2019 - Apr 2023
University Of Engineering & Management, Jaipur
 - GPA: 7.67
- WBCHSEMar 2017 - Feb 2019
Naihati Narendra Vidhya Niketan(H.S.)
 - Percentage: 65
- WBBSEJan 2012 - Feb 2019
Bhatpara Amarkrishna Phatsala(H.S.)
 - Percentage: 68.9

SKILLS

• HTML/CSS • Django	• Python • Flask	• ReactJS • Mern Stack	• MySQL • NodeJS	• Figma • Adobe XD
• AWS • CICD	• Docker • Grafana	• Kubernetes • Jenkins	• Git • Terraform	• Microsoft Azure • Google Cloud Platform (GCP)

COURSES

• Python Programming Language	Jul 2019
• Cyber security rules , process and operating system security	Nov 2020
• C for Everyone: Programming Fundamentals	Nov 2021
• Programming Foundations with JavaScript, HTML and CSS	Feb 2022
• Developing Cloud Applications with Node.js and React	Mar 2022
• Software Testing	Mar 2024

AREA OF INTEREST

• Data Structure, Java, Spring MVC, Data Science, Asp.Net, Web Development, Full Stack Development
--

ACHIEVEMENTS

• Developed individual modules. • Have developed software product from scratch. • Responsible for Deployment at production environment. • Training Freshers in Current Organization. • Participating in College fest. • Participating and Winning in quiz competition.
--
